MDM Mobile Device Management

Control your IoT digitisation before it affects your bottom line

Restriction of Company Data

Full Control Over Technology

Protection of Misusage

MDM is a mobile management software to assist in controlling the use of the device. Businesses with mobile workforce require secure devices to ensure responsible usage, improve productivity and reduce maintenance cost. Devices can be Locked down by allowing access to the required applications and preventing users from making any unintended changes in the solution.

Industries:

Health Care — Cleaning — Facility Management — Construction — Security
